61 D-7.002 Calculation of Payout and Distribution of Pools --General.
- (1) Each pari-mutuel wagering pool shall be separately and independently calculated and distributed and shall have no connection with or relation to any other pool or form of wagering.
- (2) For each wagering pool, the amount wagered on the winning betting interest or betting combinations is deducted from the net pool to determine the profit:
- (a) For a single price pool, the profit is then divided by the amount wagered on the winning betting interest or combinations, the quotient, plus one dollar, being the profit per dollar.
- (b) For a profit split, the profit is divided by the number of covered winning combinations

involved in the profit split and then divided by the amount wagered on each combination plus a dollar to determine the unique price for each combination. This applies to all profit split calculations except where a different profit split calculation is required by the specifics of a wagering pool rule.

(3) The result rounded down to the nearest multiple of 10 cents (\$0.10) of the profit per dollar, plus one dollar, shall be the price per winning dollar awarded to the winning bettors.

(4) If the calculated price per winning dollar is less than \$1.10, the minimum payout shall be \$1.05. Any resulting minus pool will be an expense to the permitholder conducting the event and the applicable quest permitholders.

(5) The net pool less the total payout and, where applicable, amounts set aside for jackpots,

.constitutes the breakage for each pool or minus pool.

(6) If a betting interest in a contest is scratched, wagers on that betting interest shall be

refunded unless otherwise indicated in the rule governing a particular pool.

25

~,

(7) If a contest or performance is canceled or declared "no contest," all wagers shall be

refunded unless otherwise indicated in the rule governing the particular pool.

(8) Either the standard price calculation or, with prior notification to the Division, the net

price calculation may be used according to the following formulae:

(a) Standard Price Calculation Procedure

SINGLE PRICE POOL (WIN POOL)

gross pool = sum of wagers on all betting interests - refunds

takeout = gross pool x percent takeout

net pool = gross pool - takeout

profit = net pool - gross amount bet on winner

profit per dollar = profit / gross amount bet on winner

\$1 unbroken price = profit per dollar + \$1

\$1 broken price = \$1 unbroken price rounded down to the break point

total payout = \$1 broken price x gross amount bet on winner

total breakage = net pool - total payout

PROFIT SPLIT (PLACE POOL)

Profit is net pool less gross amount bet on all place finishers. Finishers split profit

(place profit), then divide by gross amount bet on each place finisher for two distinct prices.

PROFIT SPLIT (SHOW POOL)

Profit is net pool less gross amount bet on all show finishers. Finishers split profit

(show profit), then divide by gross amount bet on each show finisher for three distinct

prices.

(b) Net Price Calculation Procedure

SINGLE PRICE POOL (WIN POOL)

* for each source:

gross pool = sum of wagers on all betting interests - refunds

takeout = gross pool x percent takeout

net pool = gross pool - takeout

net bet on winner = gross amount bet on winner x (1 - percent takeout)

total net pool = sum of all sources net pools

total net bet on winner = sum of all sources net bet on winner

profit = total net pool - total net bet on winner

profit per dollar = profit/total net bet on winner

\$1 unbroken base price = profit per dollar + \$1

* for each source:

\$1 unbroken price = \$1 unbroken base price x (1 -percent takeout)

\$1 broken price = \$1 unbroken price rounded down to the break point

total payout = \$1 broken price x gross amount bet on winner

total breakage = net pool -total payout

PROFIT SPLIT (PLACE POOL)

Profit is the total net pool less the total net bet on all place finishers. Finishers split profit 112 and

112 (place profit), then divide by total net bet on each place finisher. The result plus one dollar is

the unique unbroken base price for each covered winning betting interest.

PROFIT SPLIT (SHOW POOL)

Profit is the total net pool less the total net bet on all show finishers. Finishers split profit 113,

113, and 113 (show profit), then divide by total net bet on each show finisher. The result plus one

dollar is the unique unbroken base price for each covered winning betting interest.

(9) If a contestant is scratched or withdrawn from wagering after betting has begun, the money bet on that contestant shall be refunded except for pools where substitutions in the

wager are required or scratches provide for the award of consolation prices. However, when the

contestant is part of an entry or a field, there shall be no refund, if the entry or the field has at

least one actual starter.

(10) Prices shall be calculated based upon the official order of finish as determined by the A

ruling of the judges or stewards. The ruling of the judges or stewards shall be final.

For the

purposes of the distribution of the pools, if the judges correct the order of finish, the prices will

on the mutuel pay-off. -

event that the wagering pools are closed inadvertently prior to the scheduled close of wagering,

the pools may be reopened and wagering may continue until the scheduled close of wagering.

period shall be known as the re-bet period.

Win, Place, Show, Exacta, Quinella, Trifecta and Superfecta. Jackpot wagers or wagers which

require more than one game for completion shall not be accepted during the re-bet period.

and pools on which the re-bet will be offered. The opening of the re-bet period shall be

announced over the public address system and displayed on the video display monitors.

half contest, the ticket holder forfeits all rights to the second half pool and jackpot; however ,

same price as any other exchange ticket.

(c) If the number of starting entries become less than seven due to a scratched contestant,

the second half contest will be canceled.

(d) If the second half contest is canceled or declared "no contest," holders of exchange tickets and first half winning tickets which were not exchanged will be entitled to the share of the second half net pool and the jackpot shall be carried over to the next corresponding Trifecta and Superfecta combination selected under the provisions of paragraphs (1)(a), (b) or (c).

Any technical problems which may require additional time for the exchange process or possible cancellation of the second half of the Trifecta and Superfecta combination are the responsibility of the mutuels manager and, where applicable, the hub tote manager.

(10) The Tri-Super Jackpot shall be capped at a level designated by the permitholder in \$1,000 increments but not exceeding the following:
